

CDB1-36

CDB1 - The perfect way to cool down your samples

The new CDB1 is an electric cooled dry bath which reaches up to -40°C in a very short time. The 36 position aluminum block has an integrated small FPSC cooler and offers great advantages. The instrument is very efficient, small, free of liquids and has a very long lifetime without any maintenance. It can be used as a single instrument as well as an integrated cooling bath in our SFC-Automation.

Specifications

- size: 250x300x430 mm (WxDxH)
- up to -40°C
- 80 Watt
- FPSC-Cooler
- ice protection
- inert gas cover
- also available with 72 or 100 positions
